

Corporate Profile

Corporate philosophy

We are committed to serving for development of the industry and the society by meeting customers' needs, realizing employees' happiness, and responding to shareholders' expectations through solid and fair corporate activities.

When we changed our company name from "Yamada Oil Machinery Manufacturing Co., Ltd." to "Yamada Corporation" in 1990, we also changed our logo to the current one, which we use to this day.

Head Office

Sagamiyara Factory

For our new centennial, we launched a new med-term management plan, **Phase I**, under a new group vision, "**For the Next Century with YAMADA PRIDE.**"

Unfortunately, our previous fiscal year (April 2024–March 2025), which was the first year of this plan and our 100th business year, did not see us surpass the record-high sales and profits of the year before. However, we were able to fulfill our commitment to our shareholders by increasing dividends as initially planned.

We live in an era of growing opacity and uncertainty, where it is often unclear which path is the right one. Despite this, our group will continue to make steady progress on the new med-term management plan we began last year.

We have positioned our pump business as a key engine for growth. By building a system to supply our flagship diaphragm pumps to various regions and markets worldwide and providing the specific quality required by each, we aim to become a top global brand. To support this global expansion, we are enhancing our new Sagami-hara factory to the next stage, aiming to increase productivity through human-friendly digital technology.

Our automotive business, a core domestic operation, is expected to see significant market and needs changes, such as the rise of EVs. We will continue to support the foundation of this business by anticipating and capturing future needs.

At the core of all our businesses are our people. We will make this a year of growth for our next century by developing employees who embody the three values of our "**Human Resources Vision:**" "**Change,**" "**Customer Focus,**" and "**Co-creation.**"

Finally, as Charles Darwin said, "It is not the strongest of the species that survives, nor the most intelligent, but the one that is most responsive to change." We are truly living in such a time. We will engrave this principle in our minds and strive to become an enterprise that is increasingly indispensable to everyone by adapting effectively to our rapidly changing environment.

We ask for your continuous support and encouragement in the coming year.

Shotaro Yamada,
President and Representative
Director of Yamada Corporation

September, 2025

Shotaro Yamada

President and Representative Director of Yamada Corporation

For the Next Century, with YAMADA PRIDE

We aim to further refine the Yamada Quality cultivated over the past 100 years, support the foundation of the automotive industry, and position our pump business, which is utilized in various industries, as our growth engine.

Our goal is to continue contributing to society as a global company for the next 100 years.

About Our Products

All Yamada products lubricate customers' field site. Starting with grease pumps for automobiles in 1905, Yamada products now include not only air-driven pumps for safe transport of liquids in various fields but also maintenance equipment using grease and oil, various types of vehicle service equipment, and stationary vacuum systems for better work environments. These products are not often seen, but our products support people working in a broad range of industries as an indispensable infrastructure for the world.

[Pumps]

Diaphragm pumps

Diaphragm pump series

Diaphragm pumps are driven by compressed air, so they can be used safely, without requiring explosion-proof measures for liquid transfer/transport, of volatile or flammable materials, or in hazardous atmospheres.

Series products

- Small pumps with 1/4" to 1" diameters
- Large pumps with 1-1/2" to 3" diameters
- Fluorine resin chemical pump
- Sanitary diaphragm pump

Drum pumps / Siphon pumps

Piston pump series

Hard materials like putty, sticky materials like adhesives, non-flowable oils and fats like grease and other similar materials can be pumped directly from the container and pushed out for direct connection to your work. In addition, these pump units wipe the inside of the containers clean to eliminate waste.

Series products

- Drum pumps / Siphon pumps
- Divorced drum pump oil pump kit
- 140/250 series high-viscosity pump units
- Pail high-viscosity pumps

Electric powered grease gun /
Hand operated grease gun

Grease gun series

As the most widespread grease pouring tools, they are available from hand-filling to cartridge types that can be selected for various applications. The electric powered gun allows you to fill grease by simple switch operation. This is ideal for maintenance of construction machinery, large vehicles, elevators, etc.

Series products

- Hand operated grease guns
- Electric powered grease guns
- Air powered grease guns
- Nozzle Micro® Hose

Grease/Oil hand bucket pumps

Lubricating equipment

Oil/Grease can be supplied with a manual pump. These grease/oil lubricators use air powered pumps driven by compressed air from compressors. They feature high performance, excellent safety, and easy operation. They are used for production line maintenance work.

Series products

- Grease/Oil hand bucket pumps
- Grease/Oil air powered pumps
- Lub drum set (fueling cart)
- Grease foot-pedal pump

Quality Policies

We have established the following quality policies to implement our management philosophy of "Customer Satisfaction First", and hereby declare that we will continue providing high quality products and services:

Quality Policy 1

We strive to work with quality awareness in all related departments so that we can respond to customer requests. (Quality / Delivery / Price / Development / Service)

Quality Policy 2

Based on our quality policies, each department sets quality targets, manages the results while measuring the status of implementation and the degree of achievement, and makes continuous improvements while confirming the effectiveness of the quality management system.

Quality Policy 3

We not only comply with various laws, regulations, and standards required for the products and services we provide, but also pursue high morality as a company.

Quality Policy 4

To be a company trusted by customers and recognized by society, we make constant efforts to raise awareness and improve ourselves, and continue to take on the challenge of developing the company.

Diaphragm pumps

A/C recharge and maintenance stations

Stationary vacuum system

[Car maintenance equipment] only for Japanese market

[Work environment improvement equipment] only for Japanese market

Portable tire air inflator / CFC changer

Hose reel

Electric powered exhaust hose reel

Welding fume /Fine dust collecting device

Automobile maintenance equipment

This is mainly used for automobile maintenance work at gas stations, automobile maintenance shops, etc. Used for checking and filling tire pressure and changing oil for automatic cars to improve vehicle safety, it also includes environmentally friendly CFC changers and other various maintenance devices.

Series products

- Portable tire air inflators
- Oil drains
- ATF/CVTF changers
- CFC changers

Hose reel series

The service hose is reeled in by spring force, and can be pulled out to a convenient length when used. Hose reels are mounted on ceilings, walls, floors, etc., and are used for greasing, oiling, and air filling.

Series products

- YR series (air, code, control)
- YSR series (air, water, oil, high-pressure hot water, grease)
- Stainless hose reels (water, hot water, high-pressure hot water)
- Control valves (mechanical batch meter)

Vehicle exhaust gas extraction systems

Yamada's exhaust gas extraction systems are offered from simple hose units to exhaust hose and sliding exhaust systems, and you can select the most suitable system depending on vehicle's exhaust volume and a place of installation.

Series products

- Electric powered exhaust hose reels
- Simple exhaust hoses, single and double
- Fans
- Filter boxes

Stationary vacuum system

A weld filter unit and a filter cart are the optimal dust extraction device for collecting and exhausting welding fume and lightweight iron powder. Since hazardous substances are also filtered with a built-in filter and then discharged, a safe and clean work environment can be realized.

Series products

- Welding fume /Fine dust collecting devices
- Arm type welding fume /fine dust collecting devices

We have obtained ISO9001 certification and declared compliance with EC Directive standards.

The ISO9000 series is an international standard for quality control and quality assurance established in 1987 by the International Organization for Standardization (ISO). Production and quality systems are evaluated to obtain the ISO9000 series, and companies that conform to it are certified, so it can be said that this standard responds to the requirements of customers.

The CE mark can only be attached to products that comply with the safety regulations set forth by the EC Directive. This mark is required for exports to the EC region, though it is an international trend for the EC market to acquire the ISO9000 series. The CE mark differs from ISO in that it is not a certification, but a declaration of conformity to EC directive standards by the company itself.

About Our Company

Since its foundation in 1905, our company has been a manufacturer specializing in liquid transfer for more than 100 years.

From the beginning, we have been steadily expanding our “customer-oriented product manufacturing” for more extensive customers, and as a result, we have now established bases not only in Japan but also in the United States, Europe, China, and Thailand, transforming ourselves into a global company with distributors in 80 countries around the world.

Yamada’s products continue to support the infrastructure of society in every part of the world.

◎Company information

- Trade name: Yamada Corporation
- Establishment: December 20, 1939
- Capital: 600 million yen
- President and Representative Director: Shotaro Yamada
- Number of employees: 346 employees in group total (as of March 31, 2025)
- Net sales: 14,628 million yen on consolidated basis
10,108 million yen on non-consolidated basis (as of March 31, 2025)
- Sales composition: Automotive division: 24.2%
Industrial division: 63.8%
Other: 12.0% (as of March 31, 2025)

◎Business lineup

- Air pumps, diaphragm pumps, and system products for pumping fluids such as oil, grease, paint, adhesives, ink, and chemicals in various industrial fields.
- Lubrication equipment such as hand pumps, bucket pumps, and lubricators for oil and grease
- Tire service equipment, environmental maintenance equipment such as exhaust gas emission systems and refrigerant gas-related equipment (for domestic Japanese market)

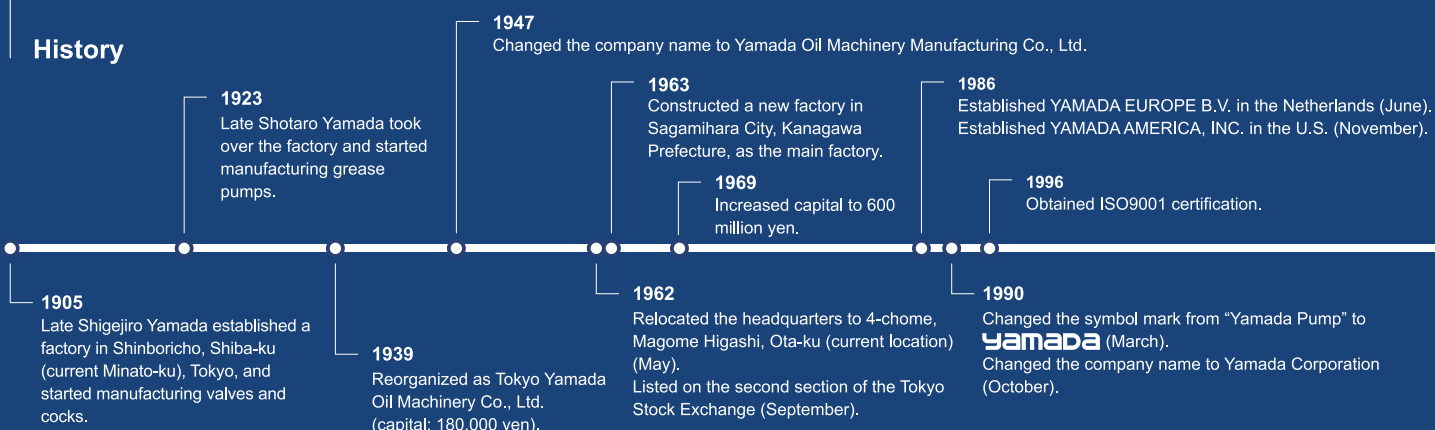

The Yamada Corporation Sagamihara Plant has been recognized as a "Sagamihara SDGs Partner."
